- List of all supported chips

What's is SciTech Stereo DirectX

SciTech Stereo DirectX is a library to enable DirectDraw and Direct3D application programs to fully utilise 3D stereo. The SciTech DirectX libraries supports most graphics controller chipsets on the market, and just about every type of stereo LC shutter glasses, head mounted displays and projector systems.

List of all supported chips

The following is a list of the graphics chips that are supported by the SciTech Stereo DirectDraw libraries, and that have been through our QA testing process. Support for more chipsets is being added on a daily basis. Please note that this list includes the name of the actual chips being used, not the name of the graphics board.

Alliance ProMotion 6422, ProMotion AT24, ProMotion AT25
Alliance ProMotion AT3D
Cirrus Logic CL-GD5434, CL-GD5440, CL-GD5436, CL-GD5446
Cirrus Logic Laguna 5462, Laguna 5464, Laguna 5465
ATI Mach64 GX, Mach64 CX, Mach64 CT, Mach64 ET, Mach64 VT, 3D Rage
ATI Mach64 VTB, 3D Rage II, 3D Rage II+, Mach64 VT4, 3D Rage IIC
ATI 3D Rage Pro, 3D Rage LT Pro, Rage Mobility, Rage XL, Rage XC
ATI Rage 128
Matrox MGA Millennium, MGA Millennium II, MGA Mystique
Matrox MGA Mystique 220, MGA-G100, MGA-G200, MGA-G400
NVIDIA RIVA-128, RIVA-128ZX, RIVA-TNT, RIVA-TNT2, RIVA-TNT2 Ultra
Rendition Verite V1000, Verite V2100/V2200
S3 Vision 864, Vision 964, Vision 868, Vision 968, Trio32, Trio64
S3 Trio64V+, Trio64UV+, Trio64V2/DX, Aurora64V+, Virge, Virge/DX/GX
S3 Virge/VX, Virge/GX2, Virge/MX, Trio3D, Trio3D2x
3DLabs Permedia, Permedia 2, Permedia 2V
